

## **Appendix D**

### **Region 2000 Bicycle Plan Road Characteristics**

The following is a complete list of the Region 2000 Bicycle Plan road recommendation corridors according to locality. Locality information corresponds to the City of Lynchburg and each of the four counties. The incorporated Towns and the City of Bedford are included within the county that these jurisdictions are located.

Within the spread sheet is detailed road characteristics that are the determining factors to the current Bicycle Level of Service (BLOS), explained in Chapter 3, and the factors that influence bicycle accommodations options along the recommended routes. The road data provided is based on information provided by the Virginia Department of Transportation (VDOT) and represents average known road information; variations of actual measurements may be different.

Within each table are some roads where no road characteristics are provided. In these instances, road characteristics were not available from the VDOT road data.
